SUPPLEMENTARY INFORMATION:

I. Abstract

A federal grant is an award of financial assistance from a federal agency to a recipient to carry out a public purpose of support or stimulation authorized by a law of the United States. The NASA Procurement Office supports NASA research, science, and education communities through the award of research/education/and training grants in the science, technology, engineering, and math (STEM) fields. NASA has a continuing commitment to identify and address inequities associated with its grant review and awards processes. To support that commitment, NASA implemented a process to collect demographic data from grant applicants for the purpose of analyzing demographic differences associated with its award processes. Information collected includes the name, gender, race, ethnicity, disability status, citizenship status, education, and career data of the respondents.

Submission of the information is voluntary and is not a precondition of award. However, if the information is not submitted, it will undermine the usefulness of information received from other respondents.
